„SVET“ Center of Mental technologies

Offers you:

- **Effective** technologies to heal "incurable" diseases
- **Recovery** through targeted alteration of consciousness
- **Restoration** of the human organism by focusing on Selected Number Sequences.

In the near future

medical practice will be changing. It will evolve from a predominantly physical treatment of the body (treatment of symptoms) to a holistic consideration and treatment of physical, mental and spiritual areas in the organism (**treatment of the sources**). This includes the harmony between spirit and consciousness as well as their restoration.

Whilst there are already several **clairvoyant schools** ("seer" schools) in Russia, such as the well known school of Arcady Petrov, student of Grigorij Grabovoj, these techniques are still widely unknown in the western world. This is due to the fact that there is rarely scientific literature or expertise in German, English or other languages.

Neurologist and clairvoyant, **Svetlana Smirnova**, and her team have focused specifically on this matter. They are now spreading their information and expertise in seminars to a wider audience. Seminars and videos are now available in **Russian, German and English (Translation)** and are offered in Germany, Europe and throughout the western world.

The main features of this school are:

1. Areas, in which **information and materialization** are created
2. **Energy informative points of the spine**
 - and how to work them
3. **Recovery of the human organism**
 - by focusing on number sequences
4. **Regeneration of organs**
5. **Rejuvenation of the human organism**
6. **Control of individual personal reality**
7. **Structure of the human spirit and soul.**

Svetlana Smirnova,

Neurologist, homeopath and clairvoyant, was born in Omsk (Siberia). She graduated from the State Medical College in 1984 and then worked for **ten years** in the psychological department of the **State Hospital, Omsk**.

Coming from a **medical as well as shamanic tradition in her family** she learned about different ancient and modern alternative healing methods from various experts and schools in Russia.

In 1995 she **moved to Germany** where she is intensively involved in alternative methods of healing. Since 2000 she also passes on her knowledge to interested people from **all levels of society** through consultation, personal guidance and **seminars, in the western world**.

Restoration of Health

Includes:

Correct functioning of the physical body to supply the life supporting processes of the human organism and/ or the healing of individual organs.

And:

the development of the human brain to a mental level at which mankind will be (again) capable of regulating their own health, by **focusing on the power of self-healing**

It's not just about physical restoration of the individual, but also about harmonizing interaction with oneself, with others and the environment. **It's also about Collective Consciousness.**

Participants will develop their individual energetic and extrasensory abilities in the course of monitoring and training!

Working principles of the "SVET"-Center are:

- **Knowledge**
- **Understanding**
- **Action**
- **Positive Results.**
